

Close the door and leave the world behind you
Open the window and listen to the breeze blow through the pines
Take a deep breath, what more can you do

Let the sun fall down all around you
Let the night surround you in a blanket of starlight
I'll whisper you a lullaby
Let the sun fall down
That old dark cloud acts like he knows you
He takes up too much time, time you could be spending holding me
But he can't have you now
It's you and me here in this room
[Oh] let the sun fall down all around you
Let the night surround you in a blanket of starlight
I'll whisper you a lullaby
Let the sun fall down
The world will keep on turning
It'll all be there come morning
So tonight
Let the sun fall down all around you
Let the night surround you in a blanket of starlight
I'll whisper you a lullaby
[Oh] let the sun fall down all around you
Let the night surround you in a blanket of starlight
I'll whisper you a lullaby
Let the sun fall down
